Description

Toshiba Viamo Portable Ultrasound

Viamo - Advanced imaging technology to go.

Image quality is always critical in ultrasound, regardless of the exam conditions, from bedside to an operating room and everything in between. We worked with our customers to ensure that Viamo gives you easy portability and premium imaging tools that maximize your performance in any clinical situation.

Our history of innovation in laptop computers influenced the design of a unique touchscreen interface that makes your work in any mode more efficient. Viamo is true performance to go.

- Great performer in a variety of roles
- Easy to maneuver or transport
- Ergonomic features let you work with comfort and ease

Viamo — Ergonomics

- A more comfortable exam for you and your patient.
- Even in difficult scanning positions or when working in tight quarters, Viamo's ergonomic features allow you to acquire the studies you need with more comfort and ease. With greater demands on sonographers than ever before, these features provide the benefits of efficiency and workflow to meet the needs of today's busy clinical settings.

Tablet Mode

- Intuitive operation with dynamic touchscreen and dedicated user interface allows for a seamless and comfortable operation of the system.

- Protocols can be programmed making your routine exams faster with a single screen touch. The Viamo touchscreen functions even while wearing sterile gloves, making this system multi-department functional.

Lightweight Transducers

- Scan with greater comfort and flexibility. Many of our transducers are interchangeable across our systems, providing additional cost efficiencies.

Viamo — Flexibility to Move Between Departments

- Viamo can be a great performer in a variety of roles around your institution. Its small form makes it easy to maneuver, while its powerful imaging makes it a valuable tool in any environment.
- Ready to Move
- Lightweight and durable
- Mount to cart stand, wall, boom arm or carry it wherever you need
- Mere seconds from stand-by to start scanning
- Viamo in the Operating Room
- In crowded areas like the O.R., Viamo's small footprint and premium imaging capability can be the perfect tool.

Viamo — Enterprise Integration

- Engineered to be compatible
- Viamo is designed to embrace open network standards to facilitate easy integration in the widest variety of network environments. All Toshiba ultrasound systems comply with DICOM standards to assure optimum communications between network systems. Additionally, to keep it working well over time, we offer a range of support services our customers have consistently rated best in the industry.
